INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/DK2004/000244

	Box	x No. I Basis of the report		
1.	Wit	With regard to the language , this report is based on the international application in the language in which it was iled, unless otherwise indicated under this item.		
		which is the language of a to international search (und publication of the international search).	slations from the original language into the following language, ranslation furnished for the purposes of: ler Rules 12.3 and 23.1(b)) tional application (under Rule 12.4) examination (under Rules 55.2 and/or 55.3)	
2.	2. With regard to the elements* of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):			
	Des	scription, Pages		
	1-78	3	as originally filed	
	Clai	ims, Numbers		
	1-16	3	as originally filed	
		a sequence listing and/or ar	y related table(s) - see Supplemental Box Relating to Sequence Listing	
3.		The amendments have result the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specially any table(s) related to set	ecify):	
4.	□ had Sup		ecify):	
	*	If item 4 annlies so	ome or all of these sheets may be marked "superseded."	

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/DK2004/000244

_		k No. III – Non-establishment o licability	f op	inion with regard to novelty, inventive step and industrial
1.		e questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-vious), or to be industrially applicable have not been examined in respect of:		
		the entire international application,		
	Ø	claims Nos. 15		
		because:		
	×	the said international application, or the said claims Nos. 15 relate to the following subject matter which does not require an international preliminary examination (specify):		
		see separate sheet		
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):		
		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.		
		no international search report has been established for the said claims Nos.		
		the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:		
		the written form		has not been furnished
				does not comply with the standard
		the computer readable form		has not been furnished
				does not comply with the standard
		the tables related to the nucleon not comply with the technical re	tide a equire	and/or amino acid sequence listing, if in computer readable form only, do ements provided for in Annex C-bis of the Administrative Instructions.
		See separate sheet for further of	detai	ls .

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial Box No. V applicability; citations and explanations supporting such statement

and/or

2. Non-written disclosures (Rule 70.9)

see separate sheet

PCT/DK2004/000244

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claim 15 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1 Prior art

Reference is made to the following documents:

D1: WO03029232 (P-document, see item VI)

D2: US4241071 D3: US4198419

D4: J. MED. CHEM., 1979, vol. 22, no. 11, pages 1347-1354

D5: WO0127068

2 Novelty (Article 33(2) PCT)

The present compounds are novel over D2-D5 in view of their S atom bridge between the 2 phenyl rings and in view of their monosubstituted piperidine ring.

3 Inventive step (Article 33(3) PCT)

The closest prior art is represented by D2 and D4 which disclose piperidine derivatives useful as antidepressant agents (see D2, claim 6 and D4, table I). Said compounds of D2 and D4 differ from the present compounds in view of their methylene bridge which in the present compounds has been replaced by a S

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/DK2004/000244

atom.

The technical problem underlying the present application is regarded as the provision of further antidepressant agents.

D3 equally discloses antidepressant agents which differ from the present compounds in view of their substituent R' in position 4 of the piperidine ring (see D3, claim 1). It is noted however that said compounds of D3 have a S bridge between the 2 phenyl rings. Accordingly, said S bridge appears to be a straightforward equivalent of the methylene bridge at least for this family of antidepressant agents. Hence, the present compounds have to be considered as obvious analogs of the D2 and D4 compounds that the skilled person would have reached just by combining D2 and D4 with D3. In the absence of any unexpected effect over D2 and D4, no inventive step can be acknowledged for the present compounds.

4 Industrial applicability (Article 33(4) PCT)

For the assessment of the present claim 15 on the question whether it is industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

Re Item VI

Certain documents cited

The priority document pertaining to the present application was not available at the time of establishing this international preliminary examination report. Hence, it is based on the assumption that all claims enjoy priority rights from the filing date of the priority document. If it later turns out that this is not correct, the P-document D1 cited in the international search report could become relevant to assess whether the claims satisfy the criteria set forth in Article 33(1) PCT.
